

In the Specification

Please replace the paragraph beginning at page 2, line 28 spanning to page 3, line 2 with the following amended paragraph:

AI --Figure 1 illustrates an exemplary joint video and still image pipeline. The exemplary joint video and still image pipeline is capable of delivering videos 120 and still images 110, i.e., photographs, at the same time. For example, while a video 120 is being viewed or recorded, a snapshot 102 may be taken to generate the still image 110. The processing of the videos 120 and the still images 110 may be in parallel. The joint video and still image pipeline is described, for example, in U.S. Patent Application, having Serial No. 10/023,808, entitled "Concurrent Dual Pipeline for Acquisition, processing and Transmission of Digital Video and High Resolution Digital Still Photographs," filed ~~on the same day herewith~~ December 21, 2001, which is incorporated herein by reference. --.
